DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,761,848 to Manlove.

Regarding Claim 1, Manlove teaches a plant pot (Manlove #6) comprising: a bottom, a drainage hole (Manlove Fig. 2 #15) provided at the bottom in a penetrating manner, and a water storage portion formed at the inside of the bottom (Manlove Fig. 3 and 5 #14).

Regarding Claim 4, Manlove teaches hollows (Manlove Fig. 1 #16) for drainage and ventilation provided at the part being in contact with the ground at the bottom of the plant pot.

Claims 1-3, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 2,885,825 to Longacre.

Regarding Claim 1, Longacre teaches a plant pot (Longacre #14) comprising: a bottom, a drainage hole (Longacre Fig. 3 #30) provided at the bottom in a penetrating manner, and a water storage portion formed at the inside of the bottom (Longacre Fig. 1).

Regarding Claim 2, Longacre teaches a drainage hole formed at the central part of the bottom, partition wall (Longacre #32) formed in a protruding manner at the circumference of the drainage hole inside the plant pot, a water storage portion formed between the corresponding partition wall and the inner circumferential surface of the side wall of the plant pot (Longacre Fig. 1).

Regarding Claim 3, Longacre teaches the side wall of the plant pot is formed in a tapered shape (Longacre Fig. 1 #14) so that the upper side of the opening becomes the large diameter and stacking can be carried out, and the plant pots which are stacked can be prevented from being stacked to each other by the partition wall provided at the circumference of the drainage hole.

Regarding Claims 6 and 7, Longacre teaches the partition wall (Longacre #32) functions as a retaining wall of a member for blocking the drainage hole.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 5, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 2,885,825 to Longacre in view of U.S. Patent No. 19,280 to Whilldin.

Regarding Claims 4 and 5, Longacre is silent on the hollows. However, Whilldin teaches hollows (Whilldin element D) for drainage and ventilation provided at the part

Art Unit: 3643

being in contact with the ground at the bottom of the plant pot. It would have been obvious to one of ordinary skill in the art to modify the teachings of Longacre with the teachings of Whilldin at the time of the invention for enhance aesthetic appeal.

Regarding Claim 8, Longacre as modified teaches the partition wall (Longacre #32) functions as a retaining wall of a member for blocking the drainage hole.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
